FACTS

Pope & Young bear taken with a Gem County Archery String & cable

WHY USE GEM COUNTY ARCHERY STRINGS ?

All strings are from BCY material, they are served under tension with a serving machine that has been able to keep up 300 LBS. of pressure on the strings while it's being served. If needed, Gem County Archery has also developed a string stretching machine. With this machine, strings or cables can be put under 530 LBS. with digital read out to let you know how much pressure is dropping due to stretch. Gem County Archery has been in the sport of archery for 17 years.

ABOUT OUR STRINGS AND CABLES

We use BCY; 8125, 452, 450. We use # 2-D on the end serving, center serving is #62XS, all end loops are served with a special technique and material. All end serving is done in a special manner to prevent movement.

Our strings and cables do not stretch with this new stretching technique that we use.

Gem County Archery standard colors are green/black. We also have BCY two color combo colors in various colors that BCY offers. The standard two color combo we use is brown/black.

Two color bow strings

ON-LINE ORDERING

We have our web site that can sell any product. At this time we sell BLACKS CREEK GUIDE GEAR and SAGE COUNTRY CAMO. We are always looking for new products that will move on the internet. Gem County Archery is Pay pal verified that gives customers satisfaction when they use our web site. Coming soon will be ATC Archery scopes. Our strings and cables can be purchased through our web site also.

Thank You, Robert Martin
